## General Purpose Spray Adhesive

### NON-CHLORINATED

This high solid adhesive is formulated for use on paper, wood, fabric, metal, plastic, foil, cork, foam rubber, leather, and a variety of other materials. High heat resistance makes this product ideal for use for applications in engine compartment, around boilers, and as a quick tack for headliners. GENERAL PURPOSE SPRAY ADHESIVE is also excellent for use in the screen printing industry. This product will secure T-shirts, fleece wear and many other fabrics to the platen during screen printing. Remains tacky and resist melting under the high temperatures required for flash curing. GENERAL PURPOSE SPRAY ADHESIVE will not transfer to the fabric or cause wrinkling.

### DIRECTIONS

SHAKE CONTAINER WELL BEFORE USING.

This product works best at room temperature. Hold can 6 to 8 inches from surface being sprayed. Use a circular motion when spraying platen. Do not concentrate in one spot. When finished spraying invert can and spray until tip is clear of adhesive.

VOC Category: Mist Spray Adhesive.

Meets the VOC Standard of 65% by weight.

Manufactured exclusively by:  
ABC COMPOUNDING CO., INC. • P. O. Box 16247 • Atlanta, GA 30321
