KNOCK-OUT®

NON-SELECTIVE WEED KILLER

Controls weeds and grasses by contact and root action

This product is intended for use around any property or facility that functions to provide a service to the general public or to public or private organizations, including hospitals, nursing homes; schools (other than preschools and day care facilities); museums and libraries; sports facilities; and office buildings. Not for use on turf being grown for sale or other commercial use as sod, or for commercial seed production, or for research purposes. For use on plants in non-crop and non-timber areas only. Not for use on crops, timber, or other plants being grown for sale or other commercial use, or for commercial seed production, or for research purposes. Not for aerial applications.

This weed killer is a ready-to-use solution designed to be applied undiluted as a spray on non-cropland areas where bare ground is desired. The degree of weed control and duration of effect will vary with the amount of product used, soil type, rainfall and other conditions. Apply any time of year except when the ground is frozen. Best results are obtained after predominant species are well established in late spring or early summer. Before treating, calibrate equipment to insure uniform coverage of area to be treated. Measure out the proper amount and apply. Coarse sprays are less likely to drift. More than two (2) broadcast applications per site per year are prohibited. Minimum of 30 days between applications.

General Weed Control: To control most weeds for an extended period of time on non-cropland areas, such as: parking lots, fence rows, loading ramps, railroad sidings, storage yards, around buildings and industrial plant sites, apply 0.9 gallons per 1,000 sq. ft. (39 gallons per acre). Controls annual weeds and grasses such as foxtail, ryegrass, wild oats, crabgrass, cheatgrass, broomsedge, ragweed, lambsquarter and turkey mullein, and other hard-to-kill perennial weeds and grasses, such as Johnsongrass, saltgrass, bouncing bet, bracken fern and horsetail.

FOR COMMERCIAL AND INDUSTRIAL USE ONLY. NOT FOR USE ON AGRICULTURAL ESTABLISHMENTS

HIGHLIGHTS

- Non-selective
- Soil sterilant
- Fast burn-down of weeds
- Oil-based

TYPICAL PROPERTIES

- Specific Gravity: 0.89
- Density: 7.4 lbs./gal
- **ACTIVE INGREDIENTS:**
 - 2,4-Dichlorophenoxyacetic acid 2-ethylhexylester..... 1.09%
 - Bromacil (5-bromo-3-sec-butyl-6-methyluracil) 0.98%
 - 2,4-Dichlorophenoxyacetic acid equivalent 0.70%
 - Inert ingredients 97.93%Contains petroleum distillates, xylene, or xylene range aromatic solvent
- Appearance: Brown liquid
- Odor: Solvent

SAFETY CAUTIONS

Keep out of reach of children.
May be fatal if swallowed, absorbed through skin or inhaled. Causes skin irritation. Do not breathe spray mist. Do not get in eyes or on clothing.
Refer to SDS and product label for additional safety information and directions for use.
