Battery Terminal Cleaner

Battery Terminal Cleaner promotes maximum battery performance. It helps maintain proper current flow. Battery Terminal Cleaner also protects battery terminals and contributes to prolong battery life. Use on:

- Fleet Cars-Trucks and Buses • Golf Carts-Fork Trucks • Construction & Agricultural Equipment

DIRECTIONS: SHAKE VIGOROUSLY BEFORE EACH USE.

Spray on cables, clamp terminals, brackets and over entire battery surface (be sure cell covers are tightly closed). After a few minutes, flush off with water or damp cloth. Apply a final light coat for added protection. For severe conditions, a second application may be necessary.

FORMULA IS ORANGE BUT TURNS RED IN PRESENCE OF ACID.

Spray will neutralize acid on battery surface. Continue spraying until orange does not turn to red for complete neutralization. Rinse with water when finished and apply a protectant.

HIGHLIGHTS

- Ammoniated
- Fast-drying
- Non-streaking

TYPICAL PROPERTIES

- Specific Gravity: 0.986
- pH: 10.60
- Foam: Circular, stable
- Odor: Ammonia
- Propellant: Hydrocarbon
- Appearance: White foam
- Net Weight: 15 ounces

SAFETY CAUTIONS

Keep out of reach of children. Read label and sds before use. Contains gas under pressure; may explode if heated. Causes skin irritation. Causes serious eye irritation.

Refer to SDS for additional safety information.
