

AERO® line of Laundry Products includes liquid detergents suitable for use in automatic dispensing systems, as well as a complete line of granular laundry products.

aero®

Laundry Softener

AERO® LAUNDRY SOFTENER is a liquid fabric softener designed to soften and eliminate static cling from laundered fabrics. Aero Laundry Softener reduces fiber damage and aids in the ironing process by reducing wrinkles. Aero Laundry Softener also leaves laundered fabrics smelling clean and fresh. Aero Laundry Softener is recommended for use in all front and top loading laundry machines.

DIRECTIONS FOR USE

1. Sort laundry by color and fabric type.
2. From fabric care directions, choose proper wash cycle and water temperature.
3. Do not overload washer with laundry.
4. Add Aero Laundry Softener during the final rinse cycle. Use 1 – 2 oz. per 50 lbs. of laundry. Adjust fabric softener dosage depending on soil, water conditions, temperature and desired fabric softness.

NOTE: Do not use more than 5 oz. per 50 lbs. to guard against waterproofing of fabric.

5. Do not over dry fabric. Aero Laundry Softener is not for use on children's sleepwear or fabric labeled as flame resistant. Not recommended for use on towels, rags or mops used in certain cleaning applications such as, window washing or floor mopping.

HIGHLIGHTS

- Softens and conditions all types of fabrics
- Reduces drying time, static cling and wrinkles

TYPICAL PROPERTIES

- pH: 4.5
- Total Solids: 7.0%
- Appearance: White Emulsion
- Fragrance: Pleasant
